ECOPURE
For a cleaner, safer, more sustainable environment

SUSTAINABLE CHEMICAL CLEANING SOLUTION

EcoPure™, the sustainable chemical cleaning solution, has been one of Avmor's most successful signature brand for many years. This carefully designed product line takes 'Avmor Clean' to the next level by combining a highly effective cleaning system with cleaning agents that are safer for custodians, safer for the people living and working within the cleaning environment, and environmentally preferable for the natural and built environment that surrounds us.

The number of people with asthma continues to grow and asthma is the leading chronic disease in children. Good Indoor Air Quality (IAQ) improves productivity. Based on a *research, employees' cognitive performance scores averaged 101 percent higher in green building environments with enhanced ventilation and improved IAQ compared to a conventional building environment. Participants' cognitive function test scores doubles in indoor environments with improved indoor environmental quality.

The study suggests that indoor environments can have a profound impact on the decision-making performance of students and workers, which is a primary indicator of worker productivity and learning.

OUR COMMITMENT TO YOU

Make Avmor's EcoPure™ the sustainable choice for your business and for your community.

We believe that sustainability is about maintaining or improving the health of the built, natural, social and economic environment. A sustainable cleaning product is one that meets the needs of PERFORMANCE, PEOPLE, PLANET, and PRICE.

PERFORMANCE

Better than leading national brands or conventional products. As part of our overall commitment to delivering quality cleaning solutions, all Avmor professional cleaning product lines are centered around product efficacy and performance. EcoPure™ cleans better or just as effective as leading national brands or conventional products. In addition, all EcoPure™ products are effective in cold water. Avmor's commitment to quality and performance results in better time management.

PEOPLE

Health and Safety for a Community.

With occupational asthma and injuries related to cleaning on a rise, Avmor's EcoPure™ consistently meets the highest international and domestic standards for health and safety. Our products are safer for users and in turn, help maintain the health and productivity of your employees. What's more, Avmor is dedicated to providing the necessary product training and education to ensure the highest level of product usage safety.

PLANET

Protection for the Environment.

Conventional cleaning products remove soils with the use of harsh chemicals. These chemicals are often as harmful as the contaminants they remove. The contaminants and chemical mixture often ends up in treatment plants, and in many cases, is released back into the environment. EcoPure™ professional cleaning products eliminate the need for harmful cleansing agents and ensure the protection of the environment. All EcoPure™ ingredients are biodegradable in accordance to the Organisation for Economic Co-operation and Development (OECD) testing.

PRICE

Cost Savings.

As part of our commitment to customers and to the environment, the EcoPure™ product line is competitively priced. A reduction in SKUs will help simplify your cleaning system, thereby increasing cost effectiveness.

ENVIRONMENT AND WORKER SAFETY IMPACT – ECOPURE™ QUALIFYING CRITERIA

- Fragrance free
- No carcinogens or teratogens
- No dibutyl phthalate
- No 2-butoxyethanol
- No ozone depleting compounds
- Low or no volatile organic compound content (VOC's)
- Low or no hazardous waste characteristics
- No persistent, bio-accumulative and toxic chemicals
- Phosphate levels below 0.5% as phosphorous
- Highly concentrated to reduce energy use associated with transportation
- Cold water effective
- No zinc floor finish
- Bottles contain 25% post-consumer recycled plastic
- Numerical and colour coded product identification

Effective performance for a wide variety of applications, including floors, washrooms, carpets, glass, stainless steel, hard surfaces and much more.
