

Laundry

FORT PLUS

Fort plus is a highly alkaline laundry builder additive. It increases the washing efficiency of the detergent. Suited for textiles heavily soiled with grease.

ZEISS SIGAVIT PLUS

Sigavit Plus is a concentrated alkali booster. It is a highly effective powder based on silicates for an intensive washing power. Sigavit plus is designed to saponify native oils and greases. All surfactants contained are biodegradable.

ACCORD PLUS

Accord plus is a concentrated blend of penetrating agents and detergents working synergistically to remove the toughest stains.

PENTA BASIS

Penta basis is a compact special all purpose detergent. It has impressive washing performance at low dosages. Penta basis is characterized by optimized anti-redeposition and anti-graying function.

X-TRACT

X-Tract is a super concentrated oil emulsifier that contains a blend of surfactants, soil suspending agents, water conditioners and fluorescent whitening agents.

TROX

Trox is a concentrated, alkaline laundry detergent containing activated oxygen bleach and enzymes. Trox reduces rejects, protects linen, speeds production and has excellent stain removal and color retention properties.

CLEAN SUPER

High performance multi purpose detergent with enzymes. Bleaching effect already from 30°C; especially suited for dry cleaning and laundry shops.

SANI POWDER

Sani Powder is an all purpose laundry detergent. Its powerful cleaning action reduces time and labor while producing sparkling whites and vivid colors. It is pleasantly scented leaving fabric smelling fresh and clean.

OXY-BLEACH

Oxy-bleach is a liquid hydrogen peroxide that contains 35% by weight of H₂O₂.

BURACTIVE

Buractive is highly concentrated powder bleach based on active oxygen. Designed to remove stains and solve whiteness degree problems. Buractive ensures safe bleaching with highest possible protection of fibers and colors.

KLOR-BLEACH

Klor-bleach is a sodium hypochlorite solution that contains 12% by weight available chlorine.

TENSAN

Tensas is a powder disinfectant based on chlorine. It is recommended for chemo-thermal disinfection according to the German epidemics law. Tensas is designed to remove strongest stains.

MUSK

Musk is a double concentrated softener for all fabrics. It gives a pleasant fresh odor with a pleasant soft feeling on skin. Musk has antistatic effect that reduces crumpling of blended fabrics. It reduces drying time and improves constant absorption of starch.

ZEISS EXTRA FRESH

Zeiss Extra Fresh is a fabric softener with long lasting fragrance. It gives a pleasant and skin friendly feeling of the washed linen. Extra fresh improves mangling capacity and finish performance.

SOUR

Sour contains an effective combination of acid neutralizer and sequestrates to provide neutral fabric prior to the softening process.

HAAS NEUTRAL

Haas Neutral is a powder neutralizing agent that is active under all conditions. It avoids post-alkalizing of the washing. Haas Neutral is economical due to the low quantities required.

Dry Cleaning

SECAPUR BREEZE

Anionic dry cleaning detergent with fresh fragrance formula, antistatic and deodorizing effect. The product can also be used for pre-spotting. Possesses excellent cleaning power and at the same time prevents soil redeposition.

OLI® FORTE

A highly concentrated dry cleaning soap used for combined cleaning and finishing. Has an optimal anti-static and deodorizing effect. Can be used in perchloroethylene.

SPOTTING TEST KIT

Universal spot removal series for professional spotting process with 5 different spotters in a 250 ml package each Blodex, Tanex, Lacex, Medex, Ferex and a bottle of solvent.

Offers a **ZERO RETURN POLICY**

when it comes to Fabric washing in the healthcare and hospitality sector. Our specialized products and programs have reached the highest level in cleanliness, spot removing and textile care. Sanipro is a member of the IFI (International Fabricare Institute) and pledge responsibility that only high quality products are available throughout its range of chemicals thereby protecting public health and prolonging the lifeline of the fabric.
