DDAM

FOAMING ACIDIC CLEANER & DISINFECTANT

DESCRIPTION

- DDAM has a triple action: Cleans, Descales & Disinfects.
- Foaming acid disinfectant for agro-food industry, designed to remove scales and calcium deposits.
- Disinfects entire surfaces of specialized industries: poultry, dairy plants, meat, beverages and processed food.
- Compatible with many materials : inox, pvc, polyethylene, polypropylene, glass
- Approved by the ministry of agriculture under n° 2030042.

HOW TO USE

- Disinfectant starting 0.5 %.
- Foaming dosage (foam generator or foaming head): 2 to 4%.
- Active at ambient temperature.
- Contact time: 15 to 20 Minutes.
- Rinse with potable water.

PRECAUTIONS

- Do not use on resin surfaces.
- Do not use on light metals.

COMPOSITION

- Phosphates: 30% +
- Non-anionic surfactants: less than 5%.
- Cationic Surfactants: Less than 5%.
- Disinfectants.

BIODEGRADABILITY

- Primary biodegradability above 90% in 28 days.
- Ultimate biodegradability above 60% in 28 days.

DISINFECTANT STANDARDS:

- Compliant to bactericides standards EN 1040 (0.5% - 5 min- 20°C) and EN 1276 (1% - 5 min- 20° C).
- Compliant to REPAB-F (Reglementation Europeenne pour la Production en Agriculture Biologique-France).

PACKING UNIT

- 24 kg can.

TECHNICAL DATA

Colour	Orange
Texture	Clear, Foaming Liquid
pH (in water)	1.9
Density	1.208
Solubility	Complete

SECURITY

Health	High
Stability	See MSDS
Reactivity	See MSDS
Personal protection	See MSDS
